## Full job description

Exciting opportunity for an experienced and innovative Engineering Manager to head up and lead the delivery of bespoke projects for a global Caterpillar rail company!

My client is innovative and world class – And you are an experienced Engineering Manager with proven leadership experience of large teams who is looking for their next exciting challenge!

Based in Kooragang Island, NSW, this permanent and full time role of **Manager Fleet Performance Engineering** is accountable for providing technical support in development and implementation of strategies, systems and processes to continually improve reliability of locomotive assets including fault-finding, troubleshooting and support the development of safe and compliant working instructions for my clients' Maintenance Agreements.

This is a very people centric and solution-based role, and the ideal candidate must possess not only proven and solid leadership experience, but also have a "Make friends and influence people" mentality as you will be at the forefront of relationship building with both new and existing stakeholders, as well as oversee other teams in order to get yours and my clients' vision and concepts realised.

You would also have had previous Rail, Locomotive, Mining or other Heavy Industry Engineering Manager experience that would align to the role.
